EVERY HOME NEEDS A
HERO

HERO SERIES
Fresh Air Appliance
A HEALTHIER HOME

Your airtight home is designed for energy efficiency by keeping the outdoor weather conditions out. But it's also keeping unhealthy and harmful elements in.

In fact, the air you breathe in your home can be up to 70% more polluted than outdoor air. Now consider that you spend most of your time indoors.

A Fresh Air Appliance can ventilate your entire home with fresh outdoor air up to 20 times per day while recovering 80% of the energy in the process.

HOW IT WORKS

CLEAN OUTDOOR AIR is drawn into the unit.

FRESH WARMED AIR is distributed throughout the house main living areas (bedrooms, living rooms, den, dining rooms and recreational room).

STALE, MUSTY, HUMID AND IMPURE AIR is extracted from the home (bathrooms, kitchen, laundry room) and used to warm up cold incoming air.

UNHEALTHY WARMED AIR is expelled outdoors.

INNOVATIVE COUNTERFLOW CORE Core is engineered to exchange energy while keeping airflows apart to avoid contamination.
